

Add AirHub™ for Pilots to your mobile device home screen

While there is currently no native application for AirHub™ for Pilots for mobile devices, you can follow the simple instructions below to add an AirHub™ for Pilots shortcut on the home screen of your iPad, iPhone, or Android devices.

The best part about our web application, all versions are updated in real time, eliminating the need to continually check if you are on the latest version to utilize the latest capabilities.

iOS Steps

Step 1: Open Safari on your iPhone or iPad. Then navigate to AirHub™ for Pilots Login page.

Step 2: Click the “Send to” icon along the bottom of the screen.

Step 3: Swipe up on the menu to expand it and click “Add to Home Screen”.

Step 4: The Add to Home Screen menu will open. The icon that will appear on your home screen, a name for the website shortcut, and the URL will automatically populate. While you can't edit the icon or the URL, you can tap to change the name of the website shortcut icon.

Tap “Add” after making any changes. Your new website shortcut will now be on your iPhone or iPad home screen.

Android Steps

Step 1: Open the Chrome browser app.

Step 2: Navigate to the AirHub™ for Pilots Login page.

Step 3: Tap the menu icon (3 dots in upper right-hand corner) and tap Add to home screen.

Step 4: While you can't edit the icon or the URL, you can tap to change the name of the website shortcut icon you'll be able to enter a name for the shortcut. Chrome will then add it to your home screen.
